**EXECUTIVE
OFFICER/APCO**

Dear Mr. Broadbent:

This is to advise you that the Bay Area Air Quality Management District is proposing a minor revision to the Major Facility Review Permit for Shoreline Amphitheatre (Facility Number A2561) and is submitting the permit to EPA for review.

The purpose of this permit revision is to increase the carbon monoxide (CO) emission limit for the A-2 Landfill Gas Flare. The current concentration limit for the flare exhaust (33 ppmv of CO, corrected to 15% oxygen (O₂), dry basis) will be replaced by a new limit of 83 ppmv of CO, corrected to 15% O₂, dry basis. This modification results in an emission increase of 1.908 tons/year of CO. In accordance with BAAQMD Regulations 2-6-201, 2-6-215 and 2-6-226, this permit revision is not a major modification pursuant to NSR or PSD, and therefore this action constitutes a minor permit revision. The A-2 Landfill Gas Flare is expected to comply with all applicable requirements.

Specifically, the following changes have been made to the permit:

- Condition # 876, Part 7 (Page 22): change the CO limit for the flare exhaust to 83 ppmv, corrected to 15% O₂, dry basis.
- Table VII-A (Page 38): change the CO limit for the flare exhaust to 83 ppmv, corrected to 15% O₂, dry basis

All changes are clearly shown in strikeout/underline format.

The District will issue the permit after the EPA 45-day review period is over and after addressing any EPA comments.

A copy of the proposed revisions to the Major Facility Review Permit is enclosed for your information. If you have any questions on this matter, please call **Steve Hill, Air Quality Engineering Manager, at (415) 749-4673.**

Very truly yours,

William C. Norton
Executive Officer/Air Pollution Control Officer
